Empyrean Gateway and Visa 3D Secure 2.0

A combination we are proud to offer to OECM Customers!

What it is?

Better, stronger fraud-detection intelligence, to put it simply. 3D Secure 2.0 is a new authentication protocol for online card payment and considered the strongest e-commerce fraud prevention tool. It greatly reduces the potential for online fraud, reduces the cost for processing fraudulent transactions and most importantly reduces processing rate. The 3DS protocol will provide a layer of security in card-not-present online transactions, therefore, greatly reducing fraudulent transactions and chargebacks.

What are the costs?

Exclusive for OECM customers

Set up Fee ~~$2,500~~
Monthly Minimum Fee ~~$500~~
Pay only $0.25 per transaction

What are the benefits?

Lowers Interchange Fee - Saves minimum of 0.5% in processing fees on qualified transactions.

Reduces Risk of Fraud and Chargebacks- with this new technology misuse of cards and loss of payments is significantly reduced.

Provides Protection - Authorization provides confirmation of identity, code, from the card issuer.

Better International Transactions – higher rate of approval for international transactions.

Secure Server - 3D Secure offers secure transactions through SSL encryption

Merchant Satisfaction - with reduction in fraud cases the merchants get an opportunity to increase sales and decrease disputed transactions.
